ENTO DOUBLE is a high-performance UV LED fly control unit, entirely **designed and manufactured in Italy**. It ensures superior capture rates for both lepidopterans and dipterans, which are trapped discreetly and effectively by the integrated high-capacity glue board.

Key Features & Performance

- **High-Efficiency UV LED:** The specialized LED module delivers performance comparable to a standard **20W fluorescent tube**, significantly reducing energy consumption.
- **Durable Construction:** Available in **powder-coated carbon steel** or **premium stainless steel** for maximum durability.
- **Custom Aesthetics:** The standard finish is **Silver Grey** (epoxy powder coating); however, **ENTOLED** can provide custom colors upon request to match any interior design.
- **Low Maintenance:** The LED module features a **quick-coupling connector** for easy servicing, requiring replacement only **once every 3 years**.

Compliance & Applications

Designed for environments where hygiene is paramount, ENTO DOUBLE is fully compliant with **HACCP (Food Hygiene) regulations**. It is an ideal solution for the entire food supply chain, particularly in front-of-house areas such as:

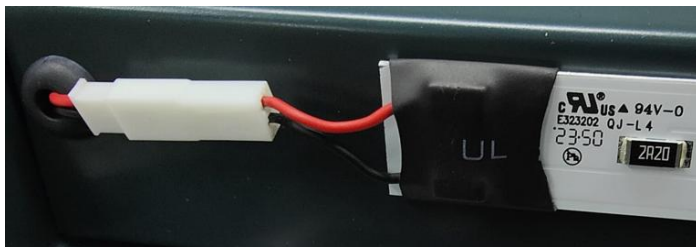

- Retail Shops & Boutiques
- Bars & Cafés
- Restaurants & Dining Areas
