<i>Weight</i>	1,49 kg
<i>Protection index</i>	IP20
<i>Installation</i>	wall mounting – flat surface
<i>Glueboard</i>	243*135 mm

ENTO MINI is a high-performance UV LED fly control unit, **entirely manufactured in Italy**. It is designed to ensure maximum capture efficiency for both Diptera (flies/mosquitoes) and Lepidoptera (moths), which are trapped discreetly by the high-quality integrated glueboard.

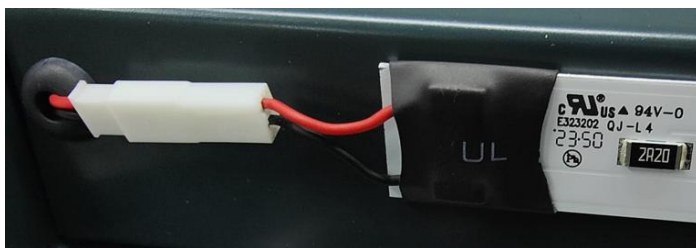

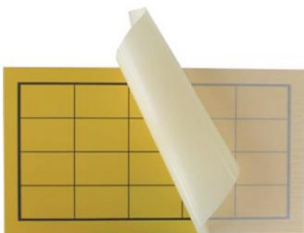

Key Features

- **Superior Efficiency:** The specialized LED module delivers performance comparable to a **11W fluorescent tube** while significantly reducing energy consumption.
- **Premium Construction:** Available in **powder-coated steel** or **stainless steel**.
- **Custom Aesthetics:** The standard finish is **Silver Grey** (epoxy powder coating); however, **ENTOLED** can provide custom colors upon request to match any interior.
- **Low Maintenance:** The LED module features a **quick-coupling connector** and requires replacement only once every **3 years**.
- **HACCP Compliant:** Fully meets food hygiene regulations, making it ideal for the entire food industry—particularly front-of-house areas like shops, bars, restaurants, and cafés.

To enhance brand identity, all ENTOLED units can be customized with the **customer's logo**. Please contact our sales department for terms and minimum order quantities.

Sales packaging
