1005 *Quadruple module lamp 6 LED UVA 365 nm*

<i>Coverage</i>	240 m ²
<i>Led type</i>	3535 High Power
<i>Led number</i>	24
<i>Power</i>	28,8 W
<i>Wavelenght</i>	365 nm
<i>Emission</i>	120°
<i>Structure</i>	Painted metal –stainless steel version available
<i>Available colours</i>	Grey silver – More colours available upon request
<i>Sizes</i>	558*360*50 (h) mm
<i>Weight</i>	4,7 kg
<i>Protection index</i>	IP20
<i>Installation</i>	wall mounting
<i>Glueboard</i>	450*325 mm

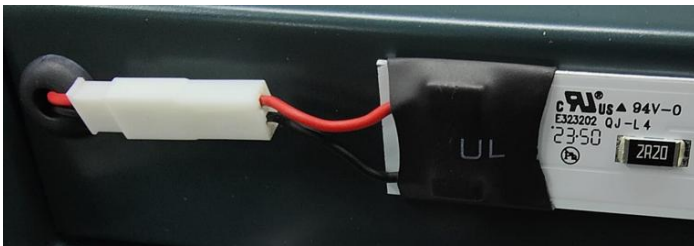

ENTO 80 is a premium UV LED fly control system, entirely **made in Italy**. It ensures high-performance capture of both lepidopterans and dipterans, which are discreetly and efficiently trapped by the integrated glueboard.

- **Powerful Performance:** The specialized LED module delivers output comparable to a standard 20W fluorescent tube while maximizing energy efficiency.
- **Durable Construction:** Built from high-quality painted metal or stainless steel. While **Silver Grey** (epoxy powder coating) is the standard finish, ENTOLED can fulfill custom color requests to match any interior.
- **Low Maintenance:** The LED module features a quick-coupling connector and only requires replacement **once every 3 years**.
- **HACCP Compliant:** Fully compliant with food hygiene regulations, the ENTO 80 is ideal for the entire food supply chain, specifically for front-of-house areas like shops, bars, restaurants, and cafés.
- **Custom Branding:** All ENTOLED units can be customized with your company logo upon request through our sales department.

Sales packaging

Single packaging, 4 modules 6 LED UVA 365 nm, 1 glue board, user and maintenance manual.

Quick coupling connector
